Job Performance Standard Test

NATURE OF EXAMINATION: All exercises in the Job Performance Standard Test are simulations of the actual tasks performed by Firefighters in the discharge of their duties. All tasks are to be performed in full protective clothing and air pack. Tasks 1 through 8 will be performed continuously with no breaks between tasks. If you are unable to perform a task, you will continue testing and retry that task at the end of the test. There will be no breaks between the end of the test and the task you are re-testing for. You will only be allowed one re-test.

TASK 1 Carry a 50 foot rolled section of double jacketed 3 inch hose from the base of the training tower up to the fourth floor and back down to the base. **PASS FAIL**

TASK 2 Using a hand-over-hand technique, raise the fly of a 35 foot extension ladder to maximum height. **PASS FAIL**

TASK 3 Pick up the nozzle end of a 1 3/4 inch hose and drag the hose 75 ft. to a pre-positioned drum. Make a 90° turn and continue an additional 25 ft. Place nozzle in box, kneel on one knee, and pull remaining 75 ft. across finish line. **PASS FAIL**

TASK 4 Crawl through restricted passage **PASS FAIL**

TASK 5 Using an 8 pound sledgehammer, move the Kieser slide to the opposite. **PASS FAIL**

TASK 6 Walk 25 yards, pick up the rescue mannequin, and carry it back to your starting point without stopping. **PASS FAIL**

TASK 8 Pick up a positive pressure fan and walk 25 yards without setting it down. **PASS FAIL**

Proctor _____

Overall Test PASS FAIL
